Thu, Dec 30, 2010 at 3:52 PM

Happy New Year.

Thank for listening to my plea for further detail about the die which was given to the ANA in 1860 by Collis.

As I told you I am working on the identity and place of the maker of the die and if it was a Westwood Mint product how it got to Newburyport from England. I referred you to the article in The Numismatist of August 1959 by Collis. This article has an image of the face of the die showing a square stem. I would like to know all the dimensions of the stem and hope you can make images from the side and back. This might enable me to determine the source. The weight of the die might be helpful too.

If you need any more details please let me know. Thanks.

Eric

Dear Eric,

I have 2 images of the die immediately available, which I have attached to this email. I will get you dimensions along with further images of the base and the remaining three sides as soon as I can, which may be a while. At least this is a start!

Dear Douglas:

Thank you for the prompt images of the Washington Born in Virginia die. I had no idea that the stem was partly truncated and conical. This may be extremely important evidence in my research. I look forward to the balance of the data even though you say it may take a while.

A large panel in your communication says DONATE TODAY and uses the year 2010 instead of 2011 so a change may be helpful.

My best

Eric

Eric,

Just in case you did not receive them – I have sent 3 emails, each with two hi-resolution images of a side of the die along with measurements. Please let me know if they do not arrive.

Dear Eric,

Thank you very much for the gift of your 100<sup>th</sup> Birthday medal! And congratulations on making it to 100 reasonably intact – the rest of us can only hope to do so well. You have been an inspiration to many with your writing and research – I hope you continue to do so for years to come.

With Sincere Thanks,
